Abdulla Al Saba

MERN Stack Developer

Dhaka, Bangladesh | +8801537312828 | abdullah.alsaba.dev@gmail.com

GitHub | LinkedIn | Portfolio

Professional Summary

MERN Stack Developer skilled in building responsive full-stack web applications using React.js, Next.js, Node.js, Express.js, and MongoDB. Experienced in developing REST APIs, JWT/OAuth authentication, protected routes, CRUD operations, responsive interfaces, and deploying applications with Vercel and Netlify. Strong foundation in JavaScript, modern React development, and collaborative problem-solving.

Technical Skills

Languages: JavaScript (ES6+) | TypeScript

Frontend: React.js | Next.js | HTML5 | CSS3 | Tailwind CSS | DaisyUI | React Router | Framer Motion

Backend: Node.js | Express.js | REST APIs | CRUD | JWT | OAuth | Better Auth | Firebase

Database: MongoDB | MongoDB Schema Design

Tools & Deployment: Git | GitHub | Vite | VS Code | Firebase | Vercel | Netlify | Render | Railway

Problem Solving: Data Structures & Algorithms (LeetCode)

Experience

Faisal's Commerce Lab **Jan 2025 – Jan 2026**

Computer Lab Assistant (Part-Time) *Dhaka, Bangladesh*

- Prepared and formatted educational documents, question papers, student records, certificates, and structured spreadsheets using Microsoft Word and Excel with consistent accuracy.
- Communicated with teachers and students to collect information, prepare required documents, and support daily academic activities.
- Handled document typing, scanning, and basic image/document editing using Photoshop while maintaining organized digital files.

Education

Dhaka Central University **Jan 2022 – Present**

B.Sc. in Chemistry *Expected Graduation: 2027*

Projects

SportNest – Sports Facility Booking Platform Jul 2026 – Aug 2026

Live Site | GitHub (Client) | GitHub (Server)

- Built a full-stack sports facility booking platform enabling users to search, filter, and book facilities by date/time, with owner-managed listings and JWT-based authentication via HttpOnly cookies and Express middleware.
- Developed an Express.js REST API with 8 endpoints for facility and booking CRUD, search/filtering, and cancellation, using a normalized MongoDB schema across 3 collections (Facility, Booking, User).
- Achieved an 86 Lighthouse Performance score (1.2s First Contentful Paint) and verified full mobile responsiveness (viewport, layout, touch targets) via Bing Mobile-Friendliness Test.
- **Tech:** Next.js | React.js | Node.js | Express.js | MongoDB | JWT | Better Auth | OAuth | Tailwind CSS | Framer Motion

Fable – Ebook Sharing & Publishing Platform May 2026 – Aug 2026

Live Site | GitHub (Client) | GitHub (Server)

- Built a full-stack ebook platform with role-based access for Readers, Writers, and Admins, enabling readers to discover, purchase, bookmark, and read ebooks while writers publish and manage their own catalog.
- Implemented secure authentication with BetterAuth, JWT, and Google OAuth, and integrated Stripe Checkout for ebook purchases and writer publishing payments.
- Developed an admin dashboard with user management, ebook moderation, transaction history, and interactive analytics charts, alongside responsive dashboards with dark mode and Framer Motion animations.
- **Tech:** Next.js | React.js | Node.js | Express.js | MongoDB | BetterAuth | Stripe | Tailwind CSS

Personal Portfolio Website Feb 2026 – Aug 2026

Live Site | GitHub Repo

- Designed and developed a responsive personal portfolio from scratch using vanilla HTML, CSS, and JavaScript, featuring custom interactions, smooth section transitions, and a custom cursor.
- Achieved perfect 100/100 Lighthouse scores in Accessibility, Best Practices, and SEO, and verified full mobile responsiveness (Bing Mobile-Friendliness Test) with SEO and Open Graph metadata for discoverability.
- **Tech:** HTML5 | CSS3 | JavaScript
